

Additional motions and ideas for your consideration

WORKPLACE HEALTH AND SAFETY Design Technologies Motions for EB11

**THAT the QTU advocate for a dedicated technical officer role for Design Technologies (ITD) where specialist knowledge is required and is at increased risk.**

Currently its up to schools to follow their own adventures largely wity the cost in mind. With TAs employed to conduct maintenance cutup materials, make repairs, conduct many tasks of a faculties manager and also an administrative officer.

That the QTU advocate for an allocative model for ITD Tech Officer

Eg 30hours per 1000 students.

**THAT the QTU advocate for time for Design Technologies teachers to receive correct and adequate time to complete the duties required under WHS legislation which is specific to the high risk nature of Design Technologies**

Eg completion of CARAs, PERAs, EMR, induction, training, Increased myHR reporting, maintenance of workshops,

**That class sizes of design technology classes both FDT and ITD be reduced to align with the legislation requitements of 5sqm per person.**

Ie most itd workshops are 9. 5x9legislation 90sqm which would be 18 persons in a workshop under legislation this is without inclusion of all safety exclusion zones and furniture.

Building and fire regulations P17 Part C 16 1. C And Building Code of Australia P10, Part D1.13 (Area per person per use)

SCHOOL FUNDING

Improve school funding including teacher aide allocation and more intensive support for students with diverse needs.

#### BEHAVIOUR

That a teacher protection policy be introduced with clear guidelines for protecting staff.
